

# Contents

## Session 1: Aerodynamic Interaction of Wind and Trees, I

---

### **The VENFOR Project: Wind and Forest Interactions from the Tree Scale to the Landscape Scale**

*Y. Brunet, T. Fourcaud, R. Belcher, I. Calmet, J.P. Caltagirone, H. Cleugh, F. de Coligny, J.J. Finnigan, H. Foudhil, M. Gamba-Garrufo, B. Gardiner, D. Guyon, D. Hughes, M. Irvine, E. Lamaud, F. Lohou, A. Lopez, P. Mestayer, A. Morse, M.R. Raupach, D. Sellier and C. Wood*

### **Storm-Related Characteristics of the Turbulent Air Flow Above a Scots Pine Forest**

*D. Schindler, H. Mayer*

### **Windstorm 'LOTHAR': Orographic Influences on Storm Damage in the Black Forest**

*J. Schmoeckel, C. Kottmeier*

## Session 2: Aerodynamic Interaction of Wind and Trees, II

---

### **The Influence of Aerodynamic Properties of Forest Edges and Stands on the Pressure Pattern within a Forest**

*W. Agster, B. Ruck*

### **The VENFOR Project: the Role of Forest Edges in the Patterns of Turbulence Development - Findings from a Field Experiment, Wind Tunnel Experiments and a Large Eddy Simulation Model Experiment**

*A.P. Morse, Y. Brunet, M. Devalance, M. Gamboa-Marrufo, M.R. Irvine, B.J. Marshall, K.T. Paw U, R.H. Shaw, C. Wood, B. Yang, B.A. Gardiner*

### **Interaction of Trees With Boundary Layer Flow**

*J. Vogt, H. Lauerbach, M. Meurer, M. Langner*

### **An Experimental Analysis of the Wind Induced Failure of Wheat Crops**

*M. Sterling, C.J. Baker, P.M. Berry*

## Session 3: Aerodynamic Interaction of Wind and Trees, III

---

### **Calibration and Applications of a Shelterbelt Turbulent Flow Model**

*E. S. Takle, M. J. Falk, X. Zhou, J. R. Brandle*

### **Shelter Efficiency of Double-Arranged Windbreaks**

*C. Frank, B. Ruck*

### **Scattered Trees and Wind Protection under African Conditions**

*C.J. Stigter, N. K. Nasr Al-amin, S.B.B. Oteng'i, R.M.R. Kainkwa, L.O.Z. Onyewotu*

**The Role of Wind for Wog Deposition Intensity in the Sudety Mts.**  
*M. Blas, M. Sobik*

---

**Session 4: Ecological Dynamics Following Windthrow**

---

**Windstorm Damage and Microsite Colonization in Pristine Pine Forests in Urho Kekkonen National Park, Eastern Lapland.**  
*H. Kauhanen*

**Consequences of Large-Scale Windthrow on the Regeneration and Diversity of Two Boreal Forests in the Central Urals**  
*S.A. Mochalov, R. Lässig, P.A. Moissev, V.A. Nechaeva, S.I. Fedorenko, Y.E. Michailov, A.Y. Syusko, A.V. Benkov, H. Lischke, E.A. Zoteeva*

**Wind Mortality in a Natural Deciduous Forest - Draved Forest, Denmark**  
*A. Wolf, R. H. W. Bradshaw, P.F. Moeller, J. Bigler*

**Stand Renewal of Storm-Damaged Beech Forests Under the Influence of Competing Vegetation**  
*C. Angst*

---

**Session 5: Aerodynamic Interaction of Wind and Trees, IV / Ecological Dynamics Following Windthrow**

---

**Wind-Driven Gap Formation and Gap Expansion in Spruce Forests of Upland Britain**  
*C.P. Quine*

**The VENFOR Project: Response of an Homogeneous Forest Canopy to Wind Stress Through the Analysis of Accelerometer Measurements**  
*F. Lohou, A. Lopez, Y. Brunet, M. Irvine, E. Lamaud*

**Development of Forest Regeneration in Bavaria After the Storm Damages in 1990**  
*H. Borchert, M. Mößnang*

**The Impact of Extreme Wind Events on Natural Forest Ecosystem Dynamics**  
*M. Kramer*

---

**Session 6: Storm Impacts and Risk Modelling, I**

---

**An Integrated Assessment of the Potential for Change in Storm Activity over Europe: Implications for Forestry in the UK**  
*C. Hanson, J. Palutikof, T. Osborn, T. Davies, T. Holt, C. Quine*

**Evaluating WINDA - A Tool for Assessing the Probability of Wind Damage to Forest Stands**

*K. Blennow, E. Olofsson, O. Sallnäs*

**Development of a GIS Based Wind Risk System for British Forestry**

*B. Gardiner, J. Suárez, C.P. Quine*

**Vulnerability of Forests to Storm Damage in a Forest District of South-western Germany Situated in the Peripherie of the Storm 1999: Analysis of Damage Composition Monitored by Salvage Cut and Recent Forest Inventory Data**

*U. Kohnle, S. Gauckler*

---

**Session 7: Physical and Numerical Modelling of Airflow around Trees**

---

**Physical Modelling of a Finite Forest Area - Transport of Biogenic Emissions**

*S. Aubrun, B. Leitl, M. Schatzmann*

**Wind Effects on Populus sp**

*G. Tevar, A. Sanz-Andres, M. Fernandez-Cañadas, M<sup>a</sup>. A. Grande*

**The VENFOR Project: A k- $\epsilon$  Model for Simulating Wind Flow in Heterogenous Forest Canopies**

*H. Foudhil, Y. Brunet, J.P. Caltagirone*

**On the Complex Atmospheric Flow Modelling Including Pollution Dispersion**

*L. Benes, T. Bodnar, Z. Janour, K. Kozel, I. Sladek*

---

**Session 8: Storm Impact and Risk Modelling, II**

---

**Wind Damage in Alternative Silvicultural Systems: Review and Synthesis of Previous Studies**

*J.R. Moore, S.J. Mitchell, D.A. Maguire and C. P. Quine*

**Gale Disasters in Slovakia : Consequences and Management Implications**

*Š. Pavlík, M. Pavlík*

**The Relative Important of Soil Acidification and Nitrogen Deposition for Storm Damage in Forest – Methodological Considerations and Presentation of a Broad Scale Study**

*P. Mayer, P. Brang, M. Dobbertin, S. Zimmerman*

**Trees in Coastal Environments of Newfoundland: Wind, Salt Spray and Climate Change**

*P. Nosko*

**Session 9: Biomechanics, I**

---

**Failure Modes For Trees and Related Criteria**

*C. Mattheck, K. Bethge, R. Kappel, P. Müller, I. Tesari*

**Wind Stability of Trees on Slopes**

*A. Achim, B. Nicoll, B.A. Gardiner*

**A Population Approach to Study Forest Stand Stability to Wind : Individual Tree-Based Mechanical Modelling**

*Ph. Ancelin, B. Courbaud, Th. Fourcaud*

**Acclimative Growth in Douglas-Fir**

*S.J. Mitchell*

**Session 10: Biomechanics, II**

---

**Compression Failures in Wind-Damaged Spruce Trees**

*M. Arnold*

**Effect of Precommercial Thinning on Balsam Fir Resistance to Windthrow**

*J.-C. Ruel, A. Achim, B.A. Gardiner, C. Larouche*

**Forest Stand Characteristics and Wind and Snow Induced Forest Damage in Boreal Forest**

*P. Pellikka, E. Järvenpää*

**The Effect of Unidirectional Stem Flexing on Shoot and Root Morphology and Architecture in Young *Pinus Sylvestris* Trees**

*S. B. Mickovski, A. R. Ennos*

**Session 11: Storm Impacts and Risk Modelling, III**

---

**Planting - A Risk for the Stability of the Stands?**

*R. Nörr*

**Stand Conditions After Heavy Storm Windthrow in Northeast Estonia**

*K. Jõgiste*

**Assessment of Effects of Thinning on Wind Damage in *Pinus thunbergii* Plantations**

*J. Zhu, T. Matsuzaki, F. Li, G. Yutaka*

## **Observations on Wind Damage in Permanent Forest Plots**

*S. Braun, W. Flückiger*

### **Session 12: Biomechanics, III**

---

#### **Root Anchorage of Maritime Pine (*Pinus pinaster* Ait.) Growing on Different Soil Conditions**

*V. Cucchi, A. Stokes, C. Meredieu, S. Berthier, A. Denis, R. Lastennet, M. Najjar, D. Bert*

#### **Modelling the influence of Morphological and Mechanical Properties on the Anchorage of Root Systems**

*L. Dupuy, P. Lac, A. Stokes, T. Fourcaud*

#### **Numerical Analysis of the Anchorage of Maritime Pine Trees in Connection with Their Root Structure**

*T. Fourcaud, F. Danjon, L. Dupuy*

#### **Incidence of Root Rots on Forest Strips Along Mountain Roads in the Alps**

*N. La Porta, P. Ambrosi*

### **Session 13: Storm Impacts and Risk Modelling, IV**

---

#### **Extent of Storms in the Ukrainian Carpathians**

*V. Lavnyy, R. Lässig*

#### **Wind-Induced Damage to Polish Forest and the Methods of Mitigating its Effect**

*M. Mikulowski, W. Gill*

#### **Impact of Windthrow in Protection Forests**

*W. Schönenberger*

### **Session 14: Biomechanics, IV**

---

#### **The VENFOR Project: Influence of Aerial Architecture on Tree Swaying - An Experimental Approach**

*D. Sellier, D. Soulier, T. Fourcaud, Y. Brunet*

#### **The Effect Growth Space Characteristics on the Tree Growth Response With Respect to Tree Mechanics and Internal Stem Properties**

*F. Brüchert*
